

## Bachelor's of Computer Application

In today's digital world it is not possible to imagine a life without computers and hand-held devices like mobile phones, smart phones etc. They prevail in every aspect of personal, professional and social life of human beings. All the industries around the world including agriculture are utilizing computers for day-to-day activities. Computer science degrees are some of the fastest tickets towards a global career in the computer industry and allied sectors.

Computer Applications is the use (application) of computers to solve a problem through programming languages. It involves all aspects of computer usage including development of software, database designing, networking, various programming languages, web development, animation, mobile computing etc. Information Technology (IT) and Information Technology Enables Service (ITES) sectors are the backbone of Indian economy as of today. They are one of the largest employers of qualified IT and Computer professionals. IT service industry including BPO, KPO, software development industries employ the best of the computer professionals.
